DESCRIPTORS	Adult Education; *Data Bases; Demography; *Directories; Educational Finance; *Educational Research; Elementary Secondary Education; *Federal Government; Health; Library Research; Magnetic Tapes; Manpower Utilization; Post Secondary Education; *Statistical Data; Statistical Surveys; Vocational Education; Welfare

ABSTRACT

This directory is the initial result of a Congressional mandate to the National Center for Education Statistics (NCES) to improve coordination among Federal agencies concerned with the collection and use of education data. It identifies and describes education data bases, predominantly quantitiative, available on computer tape from Federal agencies conducting education-relevant research and maintaning data systems. The directory's emphasis is on describing the basic methodological and substantive aspects of the survey or system from which the data are derived, the general content of the tape, and significant characteristics of the data. The following information is described for each data base: persons to contact for tape access and general information, objectives, date of data collection, periodicity of data collection, methodology, significant variables, cost of the tape, data characteristics, and auxiliary services. The directory is organized as follows: Elementary/Secondary Education; Postsecondary Education; Demographic, Vital, Health, and Welfare Data; Manpower Supply and Demand; Libraries and Media Centers; and Federal Outlays for Education. Within each level, the descriptions are arranged alphabetically by the agency which disseminates the data. (RC)

NATIONAL CENTER FOR EDUCATION STATISTICS

"The purpose of the Center shall be to collect and disseminate statistics and other data related to education in the United States and in other nations. The Center shall. . .collect, collate, and, from time to time, report full and complete statistics on the conditions of education in the United States; conduct and publish reports on specialized analyses of the meaning and significance of such statistics; and review and report on education activities in foreign countries."———Section 406(b) of the General Education Provisions Act, as amended (20 U.S.C. 1221e–1).

FOREWORD

This publication represents an initial step by NCES to respond to longstanding Congressional concern about problems related to access to Federal data. The Education Amendments of 1974 mandated NCES to participate with other agencies interested in education data to form a Federal consortium which would improve access to Federal data on education. The Federal Interagency Consortium of Users of Education Statistics provides a special opportunity for NCES to furnish support in solving that problem.

In the initial development of the Consortium, the Secretary of Health, Education, and Welfare asked more than 30 agencies to participate. The fine response of the agencies in delegating representatives for the Consortium was highly gratifying and has made it possible to compile this directory, the first product of the Consortium. At the first full meeting of the Consortium, which more than 50 persons attended, there was general agreement that an important step in meeting Congressional intent was to identify the data which actually exist and to make that information available to prospective users.

NCES was pleased to commit the staff support for the Consortium in general and for this Directory of Federal Agency Education Data Tapes. We look forward to even more diverse support and the expansion of efforts to improve accessibility of Federal data. Barbara Feller of NCES deserves credit for singlehandedly compiling this Directory and steering it to final completion and publication. Thanks are due to persons from the agencies represented in the Directory for their contributions to this first product. William Dorfman, NCES, and John Alden, ASE, provided general guidance and direction to the project.

NCES has attempted to focus this publication on the needs of the research/policy analysis community in the hope that extensive use will be made of the data described within. We solicit your comments on ways to improve this product and your suggestions for other Consortium services.

INTRODUCTION

BACKGROUND OF THE FEDERAL INTERAGENCY CONSORTIUM

During the spring of 1974, hearings on "A Bill to Provide for Obtaining Certain Educational Statistics" (HR 13991) and the "Education Amendments of 1974" (S 4379) were held in Washington, D.C., before education committees of the House of Representatives and Senate, respectively. Issues pertaining to the availability and accessibility of education data were expressed by a wide range of users throughout these hearings. Repeatedly, the view was expressed that prospective users find it difficult to keep informed about the availability of education-relevant data. Frequently, even after learning about data of possible interest, users did not know whom to contact in order to obtain the information.

In an effort to improve coordination among Federal agencies concerned with the collection and use of education data, Congress mandated the National Center for Education Statistics (NCES) of the Department of Health, Education, and Welfare to work with other agencies to form a consortium of Federal agencies interested in education data. As stated in the Education Amendments of 1974 (Public Law 93-380, Section 501), the mandate requires that:

> "The Center shall participate with other Federal agencies having a need for educational data in forming a consortium for the purpose of providing direct joint access with such agencies to all educational data received by the Center through automated data processing. The Library of Congress, General Accounting Office, and the Committees on Labor and Public Welfare and Appropriations of the Senate and the Committees on Education and Labor and Appropriations of the House of Representatives shall, for the purposes of this subparagraph, be considered Federal agencies."

Since then, NCES has organized the Federal Interagency Consortium of Users of Education Statistics, with a membership of more than 30 agencies involved in the collection and use of education data. They are listed in appendix 1 on page 171.

In general, the Consortium members agreed that availability and accessibility of education data obtainable from Federal agencies were first priorities. Future areas for Consortium planning include user needs and priorities, standardization problems, and utilization of data for cross-agency analysis.

This Directory of Federal Agency Education Data Tapes is the first product of the Consortium. It identifies and describes education data bases available on computer tape from agencies of the Federal Government conducting education-relevant research and maintaining data systems. (The screening criteria, used to help define the data of interest for the Directory, are discussed on pages 2 through 3 in appendix 2 on page 173.)

During the summer of 1975, representatives from each member agency of the Consortium canvassed* their agencies for education data bases which reside on computer tape. Each representative wrote a description of the available tapes in a specified format and submitted it to NCES for inclusion in the Directory (see appendix 3 for

*The comprehensiveness of coverage of agencies and reported data bases are thus a function of the method used by each representative within his or her agency and may vary across agencies. Screening and evaluation as to the quality of the data are beyond the scope of this endeavor, since no criteria were stipulated by NCES or the Consortium.

format.)** The Directory represents a compilation of the data base descriptions submitted to NCES during the period of June 1975 to October 1975. Consortium member agencies represented in the Directory are the

Civil Service Commission	(CSC)
Department of Commerce/Census Bureau	(CENSUS)
Department of Health, Education, and Welfare	
Health Resources Administration	(DHEW/HRA)
National Center for Education Statistics	(DHEW/NCES)

National Center for Social Statistics	(DHEW/NCSS)
National Institute of Education	(DHEW/NIE)
Office for Civil Rights	(DHEW/OCR)
Office of Education	(DHEW/OE)
Department of Labor/Bureau of Labor Statistics	(BLS)
Energy Research and Development Administration	(ERDA)
National Science Foundation	(NSF)
National Archives and Records Service	(NARS)

SCREENING CRITERIA

In order to determine which data bases would be included in the Directory, screening criteria were developed by NCES. (See appendix 2 on page 173 for the specific criteria.) First, all data bases described in the Directory are available on magnetic computer tape. Data bases available in other machine-readable form, such as card and disk, were requested but none reported. Future directories will expand the storage media coverage although it is expected that tape will be the predominant form of storage. Other screening (inclusion/exclusion) criteria are based on data base characteristics such as geographic scope, nonconfidentiality, and utility.

All the data described in the Directory are derived from sample or universe collection efforts national in scope; thus, the samples can consist of such areas as nationally sampled regions, States, Standard Metropolitan Statistical Areas (SMSA's), counties, cities, or census blocks or tracts. No requirements are placed on the frequency of data collection. The data are collected in recurring, periodic, or one-time studies and are available in conformance with requirements of the confidentiality and privacy legislation. Most of the data are of general interest and use. With a few exceptions, data describing specific Federal programs such as data on participation rates, characteristics of participants, and monies expended, are not included in the Directory.

In the development of criteria for the content of the Directory, delineation of the levels of education follows the usual classification of preschool, elementary/secondary, and postsecondary education and covers both public and nonpublic channels. Career/vocational/technical data are included in the elementary/secondary as well as postsecondary education classification. The postsecondary section also includes higher, adult/continuing, and other traditional and nontraditional forms of education which takes place beyond the years of compulsory school attendance. Although preschool and extension education as well as museum data were included in the screening criteria, no applicable data bases were reported. Similarly, while a special populations category was included (e.g., education for the handicapped, gifted, culturally deprived, bilingual, aged, foreign and exchange students, and refugees), no data bases were reported. Demographic, vital (including birth, marriage, and divorce), health, and welfare data bases containing educational background variables are included. Manpower supply and demand data are included in the Directory if the data pertain to educational institutions, educational personnel, or the educational experiences or backgrounds of persons in the labor force. There are also data on school and public libraries and media centers and on Federal outlays for education.

In general, the data bases included in the Directory consist predominantly of quantitative data; thus, bibliographic data bases such as the Educational Resource Information Center (ERIC) of the National Institute of Education of the Department of Health, Education, and Welfare are not included.

**Each agency had responsibility to ensure the accuracy of its descriptions included in the Directory.

DATA BASE DESCRIPTION FORMAT

Each description identifies and characterizes a specific data base. The descriptions are oriented to the substantive rather than technical considerations of the tapes, since the largest audience is assumed to consist of educational researchers, data analysts, program managers, and policymakers. The emphasis of the Directory is on describing the basic methodological and substantive aspects of the survey or system from which the data are derived, the general content of the tape, and significant characteristics of the data. Although technical specifications of the tape, such as the computer language by which it was generated or the character code used, are not within the scope of this product, such information is available from the appropriate contact.

Each description provides contacts through whom general information or an overview of the data base can be obtained. When necessary, a distinction is made between contacts for general information and those for access to the tapes. For example, in the NCES descriptions, a data tape may be purchased directly through the "Contact for Tape Access." Questions regarding the purchase of a tape are also directed to the "Contact for Tape Access." However, information on the content of the survey (e.g., specific data elements included and definitions of variables) and on the methodology of data collection (e.g., the mailout or interview procedure, response rate, and imputation) is obtainable through the "Contact for General Information."

Each description contains methodological information such as the date of data collection, the frequency (or, periodicity) of data collection, identification and size of the sample or universe, and the unit of data collected. Substantive information on the objectives of the data collection effort and significant variables is also provided. (In the "Significant Variables" section, only major variables are included.)

Selected characteristics of the data are specified, such as: whether the data can be accessed at and/or below the State level; whether data are current (at the date of data collection), retrospective, longitudinal, projected, and/or derived from recordkeeping activities. For each data base, information is furnished on the cost of the tape. The tape format accompanies a tape when sent to a user.

Although the Directory focuses on education data on magnetic computer tapes, additional information describing auxiliary services provided by each agency enables a user to determine whether the data can be obtained by means of special tabulations, report generation, or publications in situations where computer and programing capabilities are not readily available to the user. Questions concerning auxiliary services may be addressed to the "Contact for General Information" unless otherwise stated.

The format for the data base descriptions is presented as figure 1 on page 4. The data base reporting form used by Consortium representatives is included as appendix 3 on page 175.

ORGANIZATION OF THE DIRECTORY

The Directory is organized as follows:

Elementary/Secondary Education
Postsecondary Education
Demographic, Vital, Health, and Welfare Data
Manpower Supply and Demand
Libraries and Media Centers
Federal Outlays for Education

Within each level of education and substantive area, the data base descriptions are arranged alphabetically by the agency which disseminates the data. In most cases, the agency disseminating the data tapes is also the collecting agency; however, in a few instances they differ. For example, the National Archives and Records Service distributes tapes containing data collected by numerous other agencies, including the Manpower Administration of the Department of Labor, the Office of Economic Opportunity, and The President's Commission on Campus Unrest.

OVERVIEW OF DATA

Figures 2 and 3 array the data bases, according to significant variables contained in the data base, by level of education or topic area for individuals and institutions respectively. On each table, the columns consist of the levels of education and topic areas, and the rows represent significant variables. For example, a user who is interested in individual-based achievement data at the elementary/secondary level needs only to refer to the "Achievement" row and the "Elementary/Secondary Education" column to see which tapes contain information of possible interest. In this case, seven tapes furnish information on achievement at the elementary/secondary level of education. The abbreviations in capital letters signify the agency disseminating the tape, and the numerals to the right of the dots indicate the page on which the tape description begins. Thus "DHEW/NCES . . . ." shows that the tape description starting on the given page contains data disseminated by the National Center for Education Statistics. A tape may appear in more than one cell if it contains data applicable to other sections.

In general, variables such as achievement, educational attainment, educational experience, and socioeconomic characteristics are available for individuals. Such data include scores on verbal and nonverbal ability tests, career inventories, and grade averages; interests, attitudes, educational and occupational aspirations and plans of students, academic disciplines studied by students, and the teaching experience of staff. Information on the level of educational background of students or former students and their parents, education personnel, and persons in the Federal civilian workforce is available.

The institutional variables include curriculums and programs offered, degrees conferred, employees, enrollment, finances, institutional characteristics, and physical facilities. Institutional enrollment data are provided, for example, by sex, racial/ethnic group, and attendance and residence status. Financial data include revenues and expenditures, assets, and endowments. Institutional characteristics comprise such items as type of control, accreditation status, level of offerings, and principal officers. Data are available on physical facilities, including the number of square feet of physical plant space by type and function of room.

The actual data base descriptions follow.

ANCHOR TEST

CONTACT FOR TAPE ACCESS:

Mr. Robert A. Heintze
Department of Health, Education, and Welfare
National Center for Education Statistics
400 Maryland Avenue, SW.
Washington, D.C. 20202
Phone: 202-245-8460

CONTACT FOR GENERAL INFORMATION:

Dr. Charles Hammer
Department of Health, Education, and Welfare
National Center for Education Statistics
400 Maryland Avenue, SW.
Washington, D.C. 20202
Phone: 202-245-8712

OBJECTIVES:

To produce tables of score correspondence among widely used reading tests and to produce nationally representative norms for these tests at the fourth, fifth, and sixth grade levels to enable comparison of data.

DATE(S) OF DATA COLLECTION:

April 1972 – seven reading tests
April 1973 – additional data on seven tests and data on an eighth test

PERIODICITY OF DATA COLLECTION:

One-time

METHODOLOGY:

April 1972 – equating phase – pairs of tests were administered to a sample of approximately 500 public and nonpublic schools; the sample contains 45,000 each fourth, fifth, and sixth graders. In the 1973 data collection, additional samples of approximately 5,000 each of these grades were tested.

April 1973 – norming phase – the Metropolitan Achievement Test was administered to a randomly selected stratified sample of more than 1,000 public and nonpublic schools; the sample contains approximately 70,000 each fourth, fifth, and sixth graders.

SIGNIFICANT VARIABLES:

Pupil date of birth, sex, grade level, responses to individual test items, test scores, teacher-supplied pupil descriptions (including mother tongue, handicap status); community descriptive data; and State and school codes.

COST OF THE TAPE:

$ 94 per reel (1600 BPI)
$120 per reel (800 BPI)
5 reels – norming file
1 reel – equating file

OBJECTIVES:	To collect nationally representative statistical data from local education agencies on Federally-assisted programs. To consolidate the reporting required by several bureaus in USOE.
DATE(S) OF DATA COLLECTION:	1970, 1971, 1972
PERIODICITY OF DATA COLLECTION:	Periodic
METHODOLOGY:	For 1970 through 1972 a systematic random sample of local education agencies (LEA's) with enrollments of 300 or more was stratified by State and enrollment size; a subsample of the 2,600 districts in the States is a systematic random sample stratified by size of enrollment for 830 districts with 300 or more enrollment. An additional 188 districts were added to the sample because they had title VII, title VIII, or Follow-Through programs. The 1973 sample was stratified by region only and consisted of 756 randomly selected LEA's plus 260 additional districts having title VII, title VIII, or Follow-Through programs.
SIGNIFICANT VARIABLES:	Participation, staffing, and expenditures on specific Federally-aided programs that offer educationally-oriented services of the Elementary and Secondary Education Act (ESEA), The National Defense Education Act (NDEA), Title IV of the Civil Rights Act (CRA), the Vocational Education Act (VEA), and Follow-Through.
COST OF THE TAPE:	$94 per reel (1600 BPI) – 1 reel per year $120 per reel (800 BPI) – 1 reel per year 2 reels for 1971 and 1972

Phone: 202-245-8245

OBJECTIVES:

To provide statistics to implement the provisions of the National Defense Education Act, Elementary and Secondary Education Act, and the Education Amendments of 1974 and to determine educational needs and indicate how resources are utilized at the local level.

DATE(S) OF DATA COLLECTION:

1969-70 and 1970-71 (1972-73 available mid-1976)

PERIODICITY OF DATA COLLECTION:

Annual (except for 1971-72)

METHODOLOGY:

The universe of local public school districts (or systems) in the U.S. was stratified into six enrollment size categories. All school districts with 5,000 or more enrollment were included in the 1969-70 sample and all school districts with 10,000 or more pupils enrolled were included in the 1970-71 samples. A systematic probability sample of school districts was drawn from each of the remaining strata each survey year.

Sample size

1969-70: 5,065 local public districts (out of a universe of 17,400)
1970-71: 2,520 local public districts (out of a universe of 17,000)

SIGNIFICANT VARIABLES:

Revenues by local, State, and Federal sources; non-revenue receipts, expenditures by type; capital outlay; debt service; average daily attendance, and membership.

COST OF TAPE:

$ 94 per reel (1600 BPI) – 1 reel per year
$120 per reel (800 BPI) – 2 reels per year

400 Maryland Avenue, SW.
Washington, D.C. 20202
Phone: 202-245-8460

CONTACT FOR GENERAL INFORMATION:

Mr. Warren Hughes
Department of Health, Education, and Welfare
National Center for Education Statistics
400 Maryland Avenue, SW.
Washington, D.C. 20202
Phone: 202-245-8245

OBJECTIVES:

To provide a comprehensive listing and to classify schools and school systems by size, compute pupil/staff ratios in several ways and permit various other analyses.

DATE(S) OF DATA COLLECTION:

1969-70 through 1971-72

PERIODICITY OF DATA COLLECTION:

Annual (except for 1972-73)

METHODOLOGY:

The universe of all local public school districts in the 50 States and D.C. was stratified into enrollment-size categories. All school districts with 10,000 or more pupils enrolled were included in the 1969 and 1971 sample. The 1970 sample was a State-representative sample; certainty sizes varied from State to State. A systematic random sample of school districts was drawn from each of the remaining strata each survey year.

Sample size

1969: 1,645 (out of a total of 17,980)
1970: 5,114 (out of a total of 17,250)
1971: 2,551 (out of a total of 16,581)

SIGNIFICANT VARIABLES:

Number of local education agency staff personnel by position assignment, of nonprofessional instructional staff, professional instructional staff, nonprofessional noninstructional staff; and pupil membership by level of education.

COST OF TAPE:

$ 94 per reel (1600 BPI) – 1 reel per year
$120 per reel (800 BPI) – 1 reel per year

ELEMENTARY AND SECONDARY GENERAL INFORMATION SURVEY (ELSEGIS) – STAFF

Department of Health, Education, and Welfare
National Center for Education Statistics
400 Maryland Avenue, SW.
Washington, D.C. 20202
Phone: 202-245-8766

OBJECTIVES:

To determine the extent to which racial and ethnic groups are segregated from one another in public schools and to determine whether schools offer equal educational opportunities in terms of criteria regarded as indicators of educational quality.

DATE(S) OF DATA COLLECTION:

September and October 1965.

PERIODICITY OF DATA COLLECTION:

One-time

METHODOLOGY:

A probability sample was stratified by geographical location and county, consisting of 4,000 public schools; of these schools 645,000 third, sixth, ninth, and twelfth grade pupils and all teachers, principals, and district superintendents were surveyed.

SIGNIFICANT VARIABLES:

Characteristics of schools – racial composition, physical facilities and educational resources, curriculums offered, academic practices; characteristics of teachers – education and teaching experience, salary level, attitudes; characteristics of students–socioeconomic background, education of parents, attitudes toward self and others, academic aspirations.

COST OF THE TAPE:

$120 per reel – 34 reels (800 BPI only)

Phone: 202-245-8340

OBJECTIVES:

To describe those involved in vocational education to determine whether vocational education programs serve special groups. To supply data on vocation education teachers to provide a picture of their qualifications and give the basis for projecting replacement needs.

DATE(S) OF DATA COLLECTION:

1972

PERIODICITY OF DATA COLLECTION:

Triennial

METHODOLOGY:

(1) The main sample of schools included in the Directory was stratified by kind of program, and an independent sample was drawn from each strata with a probability proportional to the measure of size. The school principal for each sampled school listed the teachers who taught any courses in the selected school/program and then selected a teacher(s) to be sampled by rules provided to him. The sampled teacher provided a list of all courses taught in the sampled program area. One class from this list, with equal probability, was selected as the sample class. (Size = 2,504) (2) The sample of programs not in the Directory was a probability sample (Size = 1,151) (3) The supplemental district sample was a systematic sample of one-half of the districts (i.e., systems), and these districts furnished listings of their district-administered classes, if any. (Size = 800 districts; 778 classes were selected from the 587 districts reporting classes)

SIGNIFICANT VARIABLES:

Student background and family characteristics, part-time and full-time employment held by students and their vocational courses, plans for future study, and employment; and professional qualifications and teaching experience of staff.

COST OF TAPE:

$94 per reel (1600 BPI) – 1 reel
$120 per reel (800 BPI) – 1 reel

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE/OFFICE FOR CIVIL RIGHTS

ELEMENTARY AND SECONDARY SCHOOL CIVIL RIGHTS SURVEY

CONTACT FOR TAPE ACCESS:	Mr. Al Hill Department of Health, Education, and Welfare Office for Civil Rights 330 Independence Avenue, SW. Washington, D.C. 20201 Phone: 202-245-7070
CONTACT FOR GENERAL INFORMATION:	Mr. Al Hill Department of Health, Education, and Welfare Office for Civil Rights 330 Independence Avenue, SW. Washington, D.C. 20201 Phone: 202-245-7070
OBJECTIVES:	To obtain data to reflect the degree to which the Nation's public elementary and secondary schools comply with the requirements of title VI and title IX of the Education Amendments of 1972.
DATE(S) OF DATA COLLECTION:	Fall 1968 through fall 1974
PERIODICITY OF DATA COLLECTION:	Annual
METHODOLOGY:	In 1968, 1970, and 1972 the fall surveys covered about 8,000 school districts with between 70,000 and 75,000 individual schools. The percent sampled varied by the size of total enrollment of the school district; the samples were enriched by additional districts chosen because of special compliance or other monitoring activity of interest to OCR. In 1969, 1971, and 1973 a "small" survey of high interest school districts was conducted. The "small" surveys were drawn as subsets of the "even" year surveys and covered about 3,000 school districts with between 35,000 to 40,000 schools.
SIGNIFICANT VARIABLES:	In 1968, 1969, 1970, 1971, and 1972 the fall surveys asked questions at both the district and school levels about student enrollment by racial/ethnic groupings and faculty assignment by racial/ethnic groupings. In 1973 and 1974 the surveys were converted to pure enrollment surveys, with the Equal Employment Opportunity Commission having responsibility for collecting faculty data.
COST OF TAPE:	$70 per reel – 1 reel per year.

ELEMENTARY AND SECONDARY SCHOOL CIVIL RIGHTS SURVEY

DATA CHARACTERISTICS:	
DATA CHARACTERISTICS AT STATE LEVEL:	Yes
DATA CAN BE ACCESSED BELOW STATE LEVEL:	Yes

SPECIAL TABULATIONS WILL BE MADE:	No
REPORT–GENERATION CAPABILITY IS AVAILABLE:	Yes
PUBLICATIONS ARE AVAILABLE:	Yes (for 1968 and 1972 only)

NOTES

- Tape is partially edited.
- The particular questions that have been asked and the particular districts which have been surveyed have changed over the several years of the survey to reflect the specific needs and requirements of the office. When using the survey data files, it is important to realize that these surveys have been designed to support OCR in the compliance monitoring responsibility rather than providing a continuous survey coverage of the school districts in the United States. This has resulted in widely varying coverage rates, variations in coding schemes, and variations in the specific questions and methodology that have been employed. There has been no attempt, either implicit or explicit, to systematically track all of the school districts in the United States. Furthermore, there has been no attempt to systematically track selected subsets of school districts in the United States over time.

OBJECTIVES:

To provide information for recommendations about making postsecondary education available to all Americans who qualify as authorized under section 508 of the Higher Education Act Amendments of 1968.

DATE(S) OF DATA COLLECTION:

1968–69 through 1973–74 fiscal years

PERIODICITY OF DATA COLLECTION:

Annual

METHODOLOGY:

Complete enumeration of the universe of all public and nonpublic 2- and 4-year institutions of higher education. Starting in 1972, the universe consists of all these institutions *and their branches*. The size of the universe for each year is:

1968: 2,779	1971: 2,893
1969: 2,814	1972: 2,945
1970: 2,843	1973: 3,015

SIGNIFICANT VARIABLES:

Revenues and expenditures (educational and general, student aid grants, major service programs, auxiliary enterprises); land, building, equipment assets; balances and transactions on the physical plant, and endowments.

COST OF THE TAPE:

$94 per reel (1600 BPI) – 1 reel per year
$120 per reel (800 BPI) – 1 reel per year
2 reels for 1972–73 and 1973–74.

HIGHER EDUCATION GENERAL INFORMATION SURVEY (HEGIS) – FINANCIAL STATISTICS

DATA CHARACTERISTICS:

DATA CAN BE ACCESSED AT STATE LEVEL:	Yes
DATA CAN BE ACCESSED BELOW STATE LEVEL:	Yes
DATA ARE CURRENT:	Yes (at the date of data collection)
DATA ARE RETROSPECTIVE:	No
DATA ARE PROJECTED:	No
DATA ARE LONGITUDINAL:	No
DATA ARE DERIVED FROM RECORDKEEPING:	Yes

AUXILIARY SERVICES:

OBJECTIVES:

To project labor market entrants; to guide the magnitude and direction of some grants programs; and to analyze relationships between degree enrollments and degree production.

DATE(S) OF DATA COLLECTION:

Fall 1971 through fall 1973

PERIODICITY OF DATA COLLECTION:

Annual

METHODOLOGY:

Complete enumeration of the universe of all public and nonpublic 2- and 4-year institutions of higher education granting degrees beyond the baccalaureate level. Starting in 1972, the universe consists of all these institutions *and their branches*. The size of the universe for each year is:

1971: 905
1972: 931
1973: 924

SIGNIFICANT VARIABLES:

Enrollment for first-professional degrees in selected fields by attendance status; enrollment for master's and higher degrees by attendance status.

COST OF THE TAPE:

$94 per reel (1600 BPI) – 1 reel per year
$120 per reel (800 BPI) – 1 reel per year

CONTACT FOR GENERAL INFORMATION:

Mr. Elmer Collins
Department of Health, Education, and Welfare
National Center for Education Statistics
400 Maryland Avenue, SW.
Washington, D.C. 20202
Phone: 202-245-8765

OBJECTIVES:

To determine what happens to young people with regard to further training or education and to assess their ultimate place in the Nation's labor force as a consequence of personal, familial, economic, educational, and societal factors.

DATE(S) OF DATA COLLECTION:

Spring 1972 – base year survey
Fall 1973 – first-year followup

PERIODICITY OF DATA COLLECTION:

Periodic during a 6-to 8-year span

METHODOLOGY:

The respondents in NLS were sampled as 1972 12th-graders from a National probability sample of 1,318 public, private, and church-affiliated high schools located throughout the 50 States and D.C. The school sampling frame was stratified into 600 final strata, based upon: type of control of school, geographic division, grade 12 enrollment, proximity to institutions of higher education, percent minority group enrollment, income level of the community around the school, and degree of urbanization. Two schools with known probabilities were chosen from each of the strata, and within each school a simple random sample of 18 students was selected. Students in low-income areas or with high minority group populations were oversampled.

SIGNIFICANT VARIABLES:

Base year data – students' personal-family background, education and work experiences, postsecondary plans, aspirations, attitudes; test results of verbal and nonverbal ability; and items from the students' high school records. Followup data – respondents' activity status, educational, work, and career plans, and aspirations and attitudes.

COST OF TAPE:

$156 total

NATIONAL LONGITUDINAL STUDY (NLS) OF THE HIGH SCHOOL CLASS OF 1972

DATA CHARACTERISTICS:

OBJECTIVES:	To provide enrollment information by racial/ethnic group and, in 1974, by sex for higher education institutions receiving or applying for Federal financial assistance and to evaluate compliance of such institutions with various civil rights legal mandates to which they are subject.
DATE(S) OF DATA COLLECTION:	Fall 1968, 1970, 1972, and 1974 (see "Cost of Tape")
PERIODICITY OF DATA COLLECTION:	Biennial
METHODOLOGY:	Coverage of the universe of approximately 2,800 higher education institutions (as identified by NCES Higher Education General Information Survey (HEGIS)) which are recipients or applicants for Federal financial assistance. U.S. Military institutions and institutions incorporated for profit are not included. Hawaii and Alaska are not included.
SIGNIFICANT VARIABLES:	For fall 1974: selected racial/ethnic groups; sex; full- and part-time enrollment status; level of study (undergraduate by year, graduate by level, first-professional, and unclassified); undergraduate first-time community/junior college transfers; and 26 major fields of study.
COST OF TAPE:	Data tapes are being revised. Availability has therefore been suspended, in general, until approximately June 1, 1976. For further information, see "Contact for Tape Access" above.

CONTACT FOR GENERAL INFORMATION:	Mr. Murray Spitzer Department of Health, Education, and Welfare Office of Education 400 Maryland Avenue, SW. Washington, D.C. 20202 Phone: 202-245-8380
OBJECTIVES:	To evaluate the College Work Study program.
DATE(S) OF DATA COLLECTION:	1971 (data apply to the 1970-71 academic year)
PERIODICITY OF DATA COLLECTION:	One-time
METHODOLOGY:	Sample of 10,242 students in the program, 2,006 participating institutions, and 2,232 employers of College Work Study students in the student questionnaire file, institutional data file, and employer questionnaire file respectively.
SIGNIFICANT VARIABLES:	Major fields of study, institutional type and control, family income; race, sex, grade point average, earnings, and grants.
COST OF TAPE:	$ 94 per reel (1600 BPI) $120 per reel (800 BPI)

NATIONAL ARCHIVES AND RECORDS SERVICE

THE PRESIDENT'S COMMISSION ON CAMPUS UNREST – SURVEY OF CAMPUS INCIDENTS AS INTERPRETED BY COLLEGE PRESIDENTS, FACULTY CHAIRMEN AND STUDENT BODY PRESIDENTS

CONTACT FOR TAPE ACCESS:	Mr. Charles Gellert National Archives and Records Service Machine Readable Archives Division Washington, D.C. 20408 Phone: 202-376-8808
CONTACT FOR GENERAL INFORMATION:	Mr. Charles Gellert National Archives and Records Service Machine Readable Archives Division Washington, D.C. 20408 Phone: 202-376-8808
OBJECTIVES:	To analyze the causes of student unrest, to predict future patterns of unrest, and to offer recommendations for preventing student unrest.
DATE(S) OF DATA COLLECTION:	1970, covering academic years 1967-68, 1968-69, 1969-70, and the summer of 1970.
PERIODICITY OF DATA COLLECTION:	One-time
METHODOLOGY:	A sample of college presidents, faculty chairmen, and student body presidents at all accredited schools of higher learning in the United States consists of 3,341 respondents (56 percent of college presidents, 39 percent of faculty chairmen, 23 percent of student body presidents).
SIGNIFICANT VARIABLES:	Location and size of institution, sex of student body, presence of ROTC on campus, student financial aid, dollars expended per student; incidents on the campus between 1967 and the summer of 1970 that involved the presence of the National Guard, use of off-campus police, demands of students, presence of outside agitators, arrest of protestors, issuance of court injunctions, property damage, injury or deaths; etc.
COST OF THE TAPE:	$60 per reel – 1 reel per year.

CONTACT FOR GENERAL INFORMATION:

Mr. Larry Suter
Education and Social Stratification Branch
Population Division
Bureau of the Census
Washington, D.C. 20233
Phone: 301-763-5050

OBJECTIVES:

To provide a national count of the number of persons 3 years old and over and to provide data on selected socioeconomic and demographic characteristics.

DATE(S) OF DATA COLLECTION:

1970

PERIODICITY OF DATA COLLECTION:

Decennial

METHODOLOGY:

Complete enumeration of the universe of all persons in the U.S. 3 years old and over. (1) *Basic Records* on individual respondents are confidential, but special tabulations can be obtained. (2) *Public Use Samples* are based on extracts of modified basic records of 5 percent data and 15 percent data for SMSA's, States, and neighborhoods. (3) *Public Use Summary Tapes* are available for First through Sixth Counts. (4) *School District First Count* and geographic reference tapes are available. School District First Count tape includes: all school districts with enrollment of 300 or more students, districts with enrollment of less than 300 in NCES ELSEGIS II (1969) sample of school districts, school districts in the States of Illinois, Kansas, and New York with enrollment of less than 300, and school administrative units in 20 large districts of 16 States.

SIGNIFICANT VARIABLES:

Relationship to head of household, race, age, sex, marital status, State or country of birth, years of school completed, employment status, occupation, mother tongue, school or college enrollment, veteran status, Mexican or Spanish origin or descent, and vocational training completed.

COST OF TAPE:

$80 per reel – number of reels varies depending on file requested.

OBJECTIVES:

To permit socioeconomic, demographic, and family background comparisons between high school dropouts and attendees.

DATE(S) OF DATA COLLECTION:

1960 and 1970

PERIODICITY OF DATA COLLECTION:

Decennial

METHODOLOGY:

(a) *1960 State Youth Extract File* – 1 percent sample of the U.S. population, ages 14-21; based on the 1960 Public Use Sample issued by the Census Bureau (compatible with 1970 file);
(b) *1970 State Youth Extract File* (15 percent version) – 1 percent sample of the U.S. population ages 14-21; based on the 1970 State Public Use Sample created by Census from the 15 percent sample questionnaire returns;
(c) *1970 State Youth Extract File* (5 percent version) – 1 percent sample of the 1970 U.S. population, ages 14-21; based on the 1970 Public Use Sample created from the 5 percent sample questionnaire returns;
(d) *1960-1970 State High School Dropout Summary File* – 68 tables for males and females, ages 14-21, 1960 and 1970;
(e) *1970 Neighborhood High School Dropout Summary File* – 12 tables giving 1 percent sample counts of total cases and paired combinations of family and neighborhood characteristics; and
(f) *1970 Neighborhood High School Dropout Summary File* – 12 tables give 1 percent counts of total cases and high school dropouts by paired combinations of family and neighborhood characteristics.

SIGNIFICANT VARIABLES:

(a), (b), (c) – Full census information on the reference person plus selected items pertaining to the household and each present parent;
(d) Seventeen selected summary indicators tabulated by the Census Bureau for the neighborhood in addition to neighbor-

(Continued on page 116)

	hood information. (e) demographic and socioeconomic variables cross-tabulated with high school attendance status; (f) family and neighborhood characteristics by central city, urban fringe, other urban areas, and rural portions of the nine geographic divisions.
COST OF TAPE:	$94 per reel – 1600 BPI only (a), (b), (c), (d) – 2 reels each file (e), (f) – 1 reel each file

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE/HEALTH RESOURCES ADMINISTRATION

INVENTORY OF PHARMACISTS

CONTACT FOR TAPE ACCESS:	Mr. Howard V. Stambler Department of Health, Education, and Welfare Health Resources Administration 9000 Rockville Pike Bethesda, Maryland 20014 Phone: 301-496-6935
CONTACT FOR GENERAL INFORMATION:	Mr. Howard V. Stambler Department of Health, Education, and Welfare Health Resources Administration 9000 Rockville Pike Bethesda, Maryland 20014 Phone: 301-496-6935
OBJECTIVES:	To inventory all registered pharmacists in the United States to gather data on basic demographic characteristics, geographic location, education, and patterns of practice.
DATE(S) OF DATA COLLECTION:	December 1972 – June 1974
PERIODICITY OF DATA COLLECTION:	Triennial
METHODOLOGY:	Complete enumeration of the universe of 150,000 total pharmacists and 120,000 active pharmacists.
SIGNIFICANT VARIABLES:	Name of pharmacy school, first professional degree earned, year of degree, length of undergraduate program, formal advanced training, and graduate degrees.
COST OF TAPE:	$100

INVENTORY OF PHARMACISTS

DATA CHARACTERISTICS:	
DATA CAN BE ACCESSED AT STATE LEVEL:	Yes
DATA CAN BE ACCESSED BELOW STATE LEVEL:	Yes
DATA ARE CURRENT:	Yes (at the date of data collection)
DATA ARE RETROSPECTIVE:	No
DATA ARE PROJECTED:	No
DATA ARE LONGITUDINAL:	No
DATA ARE DERIVED FROM RECORDKEEPING:	No
AUXILIARY SERVICES:	
SPECIAL TABULATIONS WILL BE MADE:	Yes (on a limited basis)
REPORT–GENERATION CAPABILITY IS AVAILABLE:	No
PUBLICATIONS ARE AVAILABLE:	Yes

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

NUCLEAR RELATED TECHNICIAN SURVEY FOR THE REGION SERVED BY THE SOUTHERN INTERSTATE NUCLEAR BOARD

CONTACT FOR TAPE ACCESS:	Mr. Larry L. Barker University and Manpower Development Programs Energy Research and Development Administration 20 Massachusetts Avenue, NW. Washington, D.C. 20545 Phone: 202-376-4678
CONTACT FOR GENERAL INFORMATION:	Mr. Larry L. Barker University and Manpower Development Programs Energy Research and Development Administration 20 Massachusetts Avenue, NW. Washington, D.C. 20545 Phone: 202-376-4678
OBJECTIVES:	To provide detailed information on the demand for and supply of basic types of nuclear related technicians in the Southern Region and to provide projections of the balance, future additional demands and additional supplies of nuclear-related technicians.
DATE(S) OF DATA COLLECTION:	January 1973
PERIODICITY OF DATA COLLECTION:	One-time
METHODOLOGY:	Complete enumeration of the universe of 475 establishments in the Southern Interstate Nuclear Board Region which train, and/or employ technicians that require nuclear or radiation background in order to perform their duties. The survey universe was furnished by the Southern Interstate Nuclear Board.
SIGNIFICANT VARIABLES:	Nuclear related technician employment as of January 1, 1973; estimated additional technician needs; attrition and growth separated for the calendar years 1973, 1974, 1975, and 1976 by technician occupation; in-house training programs; length of program(s); number of anticipated graduates in calendar year 1973-1976; formal training programs and duration of programs; enrollment as of January 1, 1973; estimated number of graduates for 1973, 1974, 1975, 1976.
COST OF TAPE:	Cost reimbursable – One reel

NUCLEAR RELATED TECHNICIAN SURVEY FOR THE REGION SERVED BY THE SOUTHERN INTERSTATE NUCLEAR BOARD

DATA CHARACTERISTICS:	
DATA CAN BE ACCESSED AT STATE LEVEL:	Yes
DATA CAN BE ACCESSED BELOW STATE LEVEL:	Yes
DATA ARE CURRENT:	Yes (at the date of data collection)
DATA ARE RETROSPECTIVE:	No
DATA ARE PROJECTED:	Yes
DATA ARE LONGITUDINAL:	No
DATA ARE DERIVED FROM RECORDKEEPING:	Yes (for some institutions)
AUXILIARY SERVICES:	
SPECIAL TABULATIONS WILL BE MADE:	No
REPORT-GENERATION CAPABILITY IS AVAILABLE:	No
PUBLICATIONS ARE AVAILABLE:	Yes

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

NUCLEAR RELATED TECHNICIAN SURVEY FOR THE REGION SERVED BY THE WESTERN INTERSTATE NUCLEAR BOARD

CONTACT FOR TAPE ACCESS:	Mr. Larry L. Barker Energy Research and Development Administration University and Manpower Development Programs 20 Massachusetts Avenue, NW. Washington, D.C. 20545 Phone: 202-376-4678
CONTACT FOR GENERAL INFORMATION:	Mr. Larry L. Barker Energy Research and Development Administration University and Manpower Development Programs 20 Massachusetts Avenue, NW. Washington, D.C. 20545 Phone: 202-376-4678
OBJECTIVES:	To provide detailed information on the demand for and the supply of basic types of nuclear-related technicians in the Western Region and to provide projections of the balance, future additional demands, and additional supplies of nuclear-related technicians.
DATE(S) OF DATA COLLECTION:	January 1975
PERIODICITY OF DATA COLLECTION:	One-time
METHODOLOGY:	Complete enumeration of the universe of 1,025 establishments in the Western Interstate Nuclear Board Region which employ and/or train technicians that require nuclear or radiation background in order to perform their duties. The survey universe was furnished by the Western Interstate Nuclear Board.
SIGNIFICANT VARIABLES:	Nuclear related technician employment as of January 1, 1975; estimated additional technician needs; attrition and growth separated for the calendar years 1975, 1976, and 1977 by technician occupation; in-house training programs and length of program(s); number of anticipated graduates in calendar year 1975-1978; formal training programs and duration of programs; enrollment as of January 1, 1975; estimated number of graduates 1974, 1975, 1976, 1977.
COST OF TAPE:	Cost-reimbursable

Dr. Frank Schick
Department of Health, Education, and Welfare
National Center for Education Statistics
400 Maryland Avenue, SW.
Washington, D.C. 20202
Phone: 202-245-8638

OBJECTIVES:

To provide specific data needed by the Office of Education and its Bureau of Libraries and Learning Resources to help identify the institutions participating in title III, Library Services and Construction Act.

DATE(S) OF DATA COLLECTION:

Fall 1973 (available mid-1976)

PERIODICITY OF DATA COLLECTION:

Biennial

METHODOLOGY:

Complete enumeration of the universe of 3,015 public and nonpublic 2- and 4-year institutions of higher education. Starting in 1972, the universe consists of all these institutions *and their branches.*

SIGNIFICANT VARIABLES:

Resources, physical facilities, staffing pattern, salaries and wages, number of employees, level of educational attainment, current expenditures, and number of learning resource centers.

COST OF THE TAPE:

$ 94 per reel (1600 BPI) –
$120 per reel (800 BPI) –

HIGHER EDUCATION GENERAL INFORMATION SURVEY (HEGIS) – COLLEGE AND UNIVERSITY LIBRARIES

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE/NATIONAL CENTER FOR EDUCATION STATISTICS

SURVEY OF PUBLIC LIBRARIES

CONTACT FOR TAPE ACCESS:

Mr. Robert A. Heintze
Department of Health, Education, and Welfare
National Center for Education Statistics
400 Maryland Avenue, SW.
Washington, D.C. 20202
Phone: 202-245-8460

CONTACT FOR GENERAL INFORMATION:

Dr. Frank Schick
Department of Health, Education, and Welfare
National Center for Education Statistics
400 Maryland Avenue, SW.
Washington, D.C. 20202
Phone: 202-245-8638

OBJECTIVES:

To provide public library statistics which can be used nationally for planning purposes of the Library Services and Construction Act (administered by the Bureau of Libraries and Learning Resources).

DATE(S) OF DATA COLLECTION:

1973 (available mid-1976)

PERIODICITY OF DATA COLLECTION:

Triennial

METHODOLOGY:

Complete enumeration of the universe of 7,600 libraries in the United States for all areas of the U.S. with 25,000 inhabitants or more. Includes but does not distinguish nonconsolidated public library systems (i.e., public library systems composed of two or more locally autonomous libraries) from public libraries.

SIGNIFICANT VARIABLES:

Name and location of library service outlets, population of area served, number of volumes of books and serials stocked, number and volumes of book stock and serials lent during the year by type of loan transaction, number and type of filled and vacant positions and number of positions filled by employees holding a 5th-year degree in librarianship, and operating receipts and expenditures during the fiscal year.

COST OF THE TAPE:

$94 per reel (1600 BPI) – 1 reel
$120 per reel (800 BPI) – 1 reel

SURVEY OF PUBLIC LIBRARIES

Federal Communications Commission
Office of Management and Budget

Appendix 2.

SCREENING CRITERIA FOR INCLUSION IN FIRST EDITION OF DIRECTORY OF COMPUTERIZED EDUCATION DATA BASES

Survey Characteristics

Either national universe or national sample. (Sample may be composed of nationally sampled regions, States, SMSA's, counties, cities, Census blocks or tracts)

Data must be available in non-confidential form

General purpose only – program data only if useful for general purposes

Content (includes both public and nonpublic institutions)

Preschool

Elementary Education

Secondary Education (includes vocational-technical programs)

Postsecondary Education
- Higher Education
- Adult Education
- Career/Occupational (includes proprietary)
- Other

Vocational/Technical Education

Adult/Continuing Education
Extension Education
Libraries and Museums

Special Populations (including education for the handicapped, gifted, culturally deprived, bilingual, aged, foreign and exchange students, refugees)

Manpower Supply and Demand includes:
(1) collective bargaining data and
(2) manpower supply and demand data if data concern the educational institutions and/or background of the individuals – e.g., years of schooling completed, highest degree earned

NOTE.–Data may be derived from recurring or one-time surveys.

Appendix 3.
REPORTING FORM FOR DATA BASE DESCRIPTION

I. IDENTIFICATION OF DATA

A. NAME OF DATA BASE

B. NAME OF DATA FILES WITHIN DATA BASE, IF ANY

II. CONTACT(S) FOR DATA: Name, agency, bureau, division, branch, address, and phone number for person(s) who can answer questions regarding the *content of* and the *access to* the data

A. CONTACT(S) FOR DATA BASE (GENERAL INFORMATION OR OVERVIEW)

B. CONTACT(S) FOR DATA FILES (INFORMATION PERTAINING TO SPECIFIC FILE)

III. ABSTRACT OF DATA BASE

Include at least the following information:

- Objectives of the study
- Date the survey was taken
- Period(s) covered by the survey (i.e., date(s) to which the data apply)
- Periodicity of survey (e.g., monthly, annual, quinquennial)
- If complete enumeration of the universe: so state and describe the universe and specify the size of the universe; or,
- If sample: describe the type of sample (e.g., stratified by age, race, sex), the universe from which the sample was drawn, and the size of the sample and the size of the universe from which the sample was drawn
- Specify the level(s) of education (e.g., elementary, secondary, higher, vocational-technical, adult/continuing, special education)
- Name the significant variables (not at the data element level, however)
- Specify the unit of data collected: individual (student, staff); school or institution, school district, school system, target group, etc.
- Specify the geographic scope of the data collected (Nation, region, State, SMSA, county, city, Census block, Census tract)

IV. DATA CHARACTERISTICS (AT DATA BASE LEVEL)

	Yes	No	Remarks about exceptions (for example, at file level)
-- There are confidentiality restrictions			
-- Tape is partially edited			
-- Data can be aggregated at State level			
– Data can be aggregated below State level			
– Data are retrospective			
– Data are current			
– Data are longitudinal			
– Data are projected			
– Data are derived from recordkeeping activities			
– If sample, there is (are) control group(s)			

V. PRODUCT AND TECHNICAL DOCUMENTATION

A. TAPE: Number of reels and cost per reel

B. TECHNICAL DOCUMENTATION AVAILABLE: Tape format must be available

– State whether survey form is available; if available, specify cost if any and contact for obtaining form (if different from part II)

– Specify what other technical documentation is available and costs

C. AUXILIARY SERVICES

	Yes	No	Remarks (for example, special tabulations can be made on a limited basis)
– Special tabulations will be made			
– Special analyses will be made			
– Report-generation capability is available			
– Publications and/or printed reports are available
